## PROFESSIONAL SUMMARY

Front-End Developer with ~2 years building production web apps in React, Next.js (App Router), and TypeScript. Currently shipping **FreightIn**, a live B2B maritime logistics platform: Figma-to-code UI, TanStack Query data layers, reusable component systems, and Core Web Vitals optimization. Works daily in an AI-assisted workflow with Claude Code, with a focus on reviewing and owning the code that ships.

## WORK EXPERIENCE

**Front-End Developer — FTL Group, Cairo** Jan 2025 – Dec 2025 • Apr 2026 – Present

Rejoined in Apr 2026 after a short role at Coretech Innovation.

- Built the **FreightIn** front end from Figma with Next.js App Router, TypeScript, and Tailwind CSS: sea, air, and land rate search, multi-step quotation requests, and shipment tracking.
- Structured pages around the App Router server/client boundary: Server Components for server-side data fetching, Client Components only where interactivity needs them.
- Improved Largest Contentful Paint (LCP) on key pages by lazy-loading heavy dependencies and removing render-blocking work.
- Built the server-state layer for rate search and dashboards with TanStack Query: caching plus consistent loading, error, and empty states.
- Set up FreightIn's feature-based folder structure and shared component layer; extend the component library and fix production UI bugs.
- Built type-safe multi-step forms with React Hook Form, with Framer Motion transitions between steps.
- Ship features with Claude Code in an agentic workflow, reviewing and refactoring generated code against team conventions before pull requests.

**Web Developer — Coretech Innovation, Cairo** Jan 2026 – Mar 2026

- Built admin dashboards and control UIs for EV charging systems and EEBUS integration with React and TypeScript.
- Built responsive, data-dense IoT and e-mobility monitoring interfaces on top of REST APIs.

**Lab Assistant (Front-End Track) — ITI, Sohag** May 2024 – Jan 2025

- Supported 50+ students in HTML, CSS, JavaScript, and React labs; debugged their code and reviewed 10+ projects, explaining component and state patterns.

## SELECTED PROJECTS

**FreightIn** freightin.net FTL Group • Next.js App Router • TypeScript • TanStack Query  
Live B2B maritime logistics platform: sea, air, and land rate search, multi-step quotation requests, and shipment tracking.

**TraderIn** traderin.net FTL Group • Next.js • TypeScript • Tailwind • shadcn/ui • Recharts  
B2B wholesale marketplace with seller admin dashboards: orders, product catalogue, and Recharts analytics.

**Taj** tajteach.com Freelance • Next.js • TypeScript • Tailwind • TanStack Query • Zustand  
Education platform with role-based dashboards for students, teachers, and admins.

## TECHNICAL SKILLS

**Core:** JavaScript (ES6+), TypeScript, HTML5, CSS3  
**Frameworks:** React.js, Next.js (App Router, Server Components), React Native (Expo)  
**State & Data:** TanStack Query (React Query), Redux Toolkit, Zustand, Context API, REST API Integration, React Hook Form  
**Styling & UI:** Tailwind CSS, shadcn/ui, Framer Motion, Sass, MUI, Ant Design, Bootstrap  
**UI Implementation:** Figma to Code, Responsive Design, Cross-Browser Compatibility, Accessibility, RTL/i18n (Arabic/English)  
**Architecture:** Feature-Based Architecture, Reusable Component Systems, Design Systems  
**Performance:** Core Web Vitals (LCP, CLS), Code Splitting, Lazy Loading, Bundle Optimization  
**AI-Assisted Development:** Claude Code, agentic coding workflows, context engineering (CLAUDE.md rules, custom skills), AI code review  
**Tools:** Git, GitHub, GitLab, Figma, Lighthouse, Chrome DevTools

## EDUCATION & LANGUAGES

**Information Technology Institute (ITI) — Front-End & Cross-Platform Mobile Development Diploma** Nov 2023 – Apr 2024

**Sohag University — B.Sc. Computer Science** 2017 – 2021

**Languages** — Arabic (Native) • English (Professional working proficiency)
